Sicherheitshinweise: Safety instructions:

Um Haarrisse zu verhindern, vermeiden Sie extreme Temperaturen sowie Temperaturschwankungen. Lassen Sie Ihr Paket vor dem Auspacken Raumtemperatur annehmen.

To prevent hairline cracks, avoid extreme temperatures and temperature fluctuations. Allow your package to reach room temperature before unpacking.

Vorsicht bei Montage der Klickverbindungen - Quetschgefahr.
Be careful when assembling the click connectors as there is a risk of crushing injury.

Vermeiden Sie Knicke bei der Lagerung der Druckteile.
Avoid crimps when storing the print.

Für unsachgemäßen Aufbau bzw. Nutzung übernehmen wir keine Haftung.
We assume no liability for improper assembly or use.

Nur für den Einsatz im Innenbereich geeignet.
Only suitable for indoor use.

Aufbau

- 1) Verbinden Sie das Flex LED Profil 100cm (Nr. 1) mit den beiden Standfüßen (Nr. 5).

Gesamtbreite 85cm:

Verwenden Sie das Flex LED Profil 85cm (Nr. 2).

Tipp:

Zum einfacheren Aufziehen des Druckteils verwenden Sie unser praktisches Keder-Tool.

Achtung:

Vor Abbau bitte sorgfältig alle Kabelverbindungen lösen!

Assembly

- 1) Connect the Flex LED profile 100cm (No. 1) with the two feet (No. 5).

Total width 85cm:

Use the Flex LED profile 85cm (No. 2).

- 2a) Attach the Flex profile with 100 cm cable (No. 4) on the left base.

Caution:

Please use the cable labeled **m+m** (male/male)!

- b) Insert the Flex profile without cable 100 cm (No. 3) onto the right base.

- 3) Connect the other Flex LED profile 100 cm (No. 1) with a corner connector (No. 6) on each side so that you can place the upper part on the trade fair counter that has been set up so far.

Total width 85cm:

Choose the Flex LED profile 85 cm (No. 2)

- 4) Install the counter top 100 cm (No. 7) by inserting it into the outer rails that are screwed to the underside of the counter top of the Flex LED profile. Make sure the countertop is flush with the rest of the system.

Total width 85cm:

Choose the counter top 85 cm (No. 8)

- 5) Now plug the cable connections together. Guide the power supply cable (No. 9) through the hole on the right base and connect it to the power circuit.

- 6) After a functional test, you can attach the printed part. Attach this using the piping. This is pressed into the groove of the frame.

Tip:

To make mounting of the print easier, use our practical piping tool.

Warning:

Please loosen carefully all cable connections before dismantling!
